

Exercise: Create and process business transactions using various document posting functions

Estimated Completion Time: **1 hour**

1.1 Overview

This exercise requires participants to create park document and complete it. Create hold document, sample document, recurring document and regular documents. Reverse any document and post some clearing invoices.

1.2 Instructions

1. Create/Post 3 or 4 GL business transactions.
2. Park one of the documents with incomplete information. Later, retrieve the parked document and complete all the information required for posting invoice and post it.
3. Hold one of the documents from point 1 and save with temporary document number. Later, retrieve it and complete the document and post it.
4. Use already posted document from point 2/3 and use it as sample document to create new document and post it.
5. Create a recurring document to post on 2nd of every month for the next 8 months. It can either be invoice or credit memo.
6. Reverse one of the documents created in point 1
7. Make partial payment to the invoices created in point 1
8. Create a tolerance group and assign to user id. See if the cash discount is applied while making payment
9. Make post with clearing for invoice in point 1

1.3 Hints

1. Go to FB03 or document display to view the list of documents posted
2. For more information on document processing, refer online help
